BASE SIX CODE

How to use this chart to make your own color code:

Choose a color for each of the digits 0 through 5.

Then give each letter the two colors for its number.

For example if 0 is red and 1 is blue and 2 is yellow, A would be red and blue, and B would be red and yellow.

Fill out the whole chart and then you will have a color code you can use to write messages. Since this is base six, you only need 6 colors.

For more coloring sheets, including other color codes, and descriptions of knitting using this code, check www.sonderbooks.com/sonderknitting/
